

POLITIKA SMANJENJA EMISIJA

Međunarodni aerodrom Sarajevo kao društveno odgovorna organizacija nastoji biti primjer i pokazati želju i ambicioznost za očuvanje okoline i održivi razvoj. Svoju jasnu opredijeljenost potvrđujemo i punom primjenom zahtjeva Sistema upravljanja okolišem prema ISO 14001.

Kada je riječ o smanjenju emisija ugljika, Međunarodni aerodrom Sarajevo opredijeljen je da:

- Prati globalna kretanja o klimatskim promjenama i prepoznaje aspekte koji mogu imati utjecaja na aerodromsku djelatnost;
- Upotrebom savremenih organizacionih, tehničkih i tehnoloških rješenja poduzima sve mjere za smanjenje emisija;
- Koristi obnovljive izvore energije kad god i gdje god je moguće;
- Implementira energetske učinkovite rješenja kroz investiciona ulaganja;
- U svakodnevnim aktivnostima i kroz sve procese rada racionalno troši energiju.

Naš plan je sistematski uvrstiti aspekte okoliša i klimatskih promjena u sve naše aktivnosti, što će nam omogućiti ostvarenje cilja - postati okolinski održiv aerodrom.

EMISSION REDUCTION POLICY

Sarajevo International Airport as socially responsible organization strives to serve as an example and to show willingness and ambition for environment protection and sustainable development. Full implementation of Environmental Management System requirements according to ISO 14001 clearly confirms our commitment.

In reference to reduction of carbon dioxide emissions, Sarajevo International Airport is committed to:

- follow global movements on climate changes and to recognize aspects which may influence the airport business operations;
- undertake all measures for reduction of emissions using the contemporary organizational, technical and technological solutions;
- use renewable energy sources when and whenever possible;
- implement energy efficient solutions through investments;
- use energy rationally in everyday activities.

Our plan is to systematically incorporate aspects of environment and climate changes into our activities, what shall facilitate an accomplishment of the goal - to become environmentally sustainable airport.

Sarajevo, 20.03.2024.

ALAN BAJIĆ
General Manager
